## WONDER-S DIE GRINDER

Compact, high speed, light weight die grinder for fine finishing, grinding, deburring, and shaping of metal, wood, glass, plastics . . . any material! Precision manufactured to American quality standards and specifications . . . designed for prolonged, rugged use without operator fatigue. Standard ¼" colletts. Excellent concentricity for use with carbide grinding heads.

**UNDER $60.00**

## *JETCHISEL* NEEDLE SCALER

For removing paint and rust, welding slag, concrete, or cleaning castings or any irregular surface the Jet Chisel is ideal. The Jet Chisel uses a fully pneumatic energy source and contains no springs (that often break), and can operate on less air consumption. It delivers 4200 blows per minute for fast operation and is "human-engineered" for prolonged use without operator fatigue. The Jet Chisel uses standard American needles. Available in 3 models for light, general, or heavy duty use.

**Prices start at less than $100.00**

## MYTON 18 DISC GRINDER

Small, light weight, air powered . . . the Myton 18 is extremely easy to operate with one hand, yet powerful enough to remove material quickly and efficiently. The convenient size allows prolonged use with complete comfort for the operator. The Myton 18 has variable speeds from 0-12,000 RPM at a touch of the control. An ideal tool for light to medium general duty. Uses standard 4" dia. abrasive discs.

**Prices start at less than $90.00**
